## JobTrac

Customer satisfaction is hard to gain and sometimes easily lost. It requires fast, accurate and current information, *NOW!* This is an aggressive, but necessary challenge in today's business world. **JobTrac** was created to control, track and process order entry, shipping and inventory information in a comprehensive and timely manner. The easy to use features of **JobTrac** provides the answers to all of your customer's questions, making you the winner every time.

### Features

**Pricing:** Set price by job, customer or product.

**Inventory:** Instantly view inventory balances.

**Price equivalents:** Set unit price by "each" or use equivalents.

**Tax / Discount:** Automatically calculate customer discounts and sales tax.

**Sales Territory:** Quickly review Salesmen history.

**Sales History:** Retrieve and review sales history on customers, products and deliveries for an indefinite period of time.

**Fees:** Delivery and driver fees are automatically calculated.

**Import / Export:** Import existing data into JobTrac with ease. Export to a variety of file formats.

**Efficiency:** Track quantities from multiple production lines.

**Job / Lot Directions:** Providing accurate directions for deliveries saves time and money. Job/Lot directions are printed on delivery tickets, including any instructions for placement of the product by the delivery person.

The screenshot shows the JobTrac software interface. At the top, there's a menu bar with 'File', 'Edit', 'JobTrac', 'Maintenance', 'Reports', 'Window', and 'About'. Below the menu bar, there are several input fields and dropdown menus for order details. The 'Order #' field contains '46927'. The 'Date Ordered' is '10/21/2004'. The 'Placed By' is 'RICKY/SCOTT'. The 'Customer' is 'UNION MASONRY & SUPPLY INC'. The 'Status' is 'COMPLETED'. The 'PO No.' is '414058'. The 'Destin' is 'NORTH CAROLINA'. The 'County' is 'HAULING CUSTOMER'. The 'Driver' is '0.0000'. The 'Tax Rate' is '0.0000'. Below these fields, there's a table with columns for 'Items', 'Directions / Notes', and 'Shipping Record'. The table has columns for 'Product ID', 'Qty', 'Unit Price', 'Qty In Unit', 'Total', 'Taxable', 'Discount', and 'Description'. The table contains five rows of data:

Product ID	Qty	Unit Price	Qty In Unit	Total	Taxable	Discount	Description
